The aim of Ainscough Industrial Services is to become the business partner of choice in the industrial services sector. To achieve this aim, the Group strategy will be to provide industry with products and services which fully meet their respective expectations. Moreover, we shall strive to ensure that we can sustain the expectations of our customers through the application of management standards as determined by the International Standards Organisation (ISO).

Ainscough Industrial Services shall therefore manage the business in keeping with the following internationally recognised Quality Management Standards:

- BS EN ISO 9001:2008
- BS EN ISO: 14001
- EN 1090

Where similarities exist between these quality frameworks, a co-ordinated approach shall be adopted in order that all three standards may integrate to further improve the aim of the business.

Ainscough Industrial Services shall ensure that all operations are planned effectively, implemented in a structured manner, audited and reviewed and any actions presented to planners for improvement.

A structured internal and external audit programme shall be employed to ensure compliance with the stated Quality Standards and all such audits shall be used as a vehicle to attain a cycle of continual improvement across the business

This Policy shall apply to all businesses within the Ainscough Industrial Services Group and shall serve as the overall Group Quality Policy. The Policy shall be reviewed annually and or updated when necessary by the Group Quality Manager.

It shall be the policy of Ainscough Industrial Services to ensure that all Processes & Procedures are effectively communicated to all personnel within the Group and that we engage & include all personnel in the aims and objectives of the Quality Management System, ensuring a solid on which to build Quality into all aspects of our business.

Matt Ainscough (CEO)
